OPTIONS

RM – 2 RU Rack mount chassis upgrade for GC-110-R or L\$ 195.00
This option is needed when placing the remote units in an electronic rack environment such as a Cable headend building. Standard on the GC-130.

SC – On site Installation and Training; South & Central Fl only @ 80% disc \$ 195.00
Within 150 miles of New York City.....\$ 200.00
All other states..... Quote

MOD55 – Modulator* for short distance – Must specify Channel (fixed)..... \$ 330.00
MOD60 - Modulator* for long distance – Can change channel (agile).....\$ 685.00
MOD60 - Modulator* for long distance – Must specify Channel (fixed)..... . \$ 485.00

* What’s a “Modulator”? All professional video information displays are displayed as *composite video* – that is – no channel at all. In order for your community to watch it as part of your TV channel lineup, this output has to be converted to a channel. ie: Channel 63 *Short distance* or *long distance* can be determined by your facility engineer (this is the distance between the modulator output and the *insertion point* of the community). In most cases, you might already own a modulator.
