

TM

GC-130 has now brought professional video information channel creativity into the realm of all budgets. Extremely sophisticated presentations are effortlessly and quickly composed using the included PC Windows editing and transfer software. Updating your channel is a simple matter of clicking a mouse and transferring your new pages effortlessly offline.

### Automated Video Information Channel Specifications

The GC-130 editing process is completely off-line and may be sent to the display unit transparently. This “batch-transfer” process allows the operator to update the channel content completely at their leisure and is only connected to the display unit during the durations of the transfer process .

Economical, entertaining to watch with its beautiful page graphics, convenient remote access, and simple to use..... What could be better ? **GC-130** – for the Information Channels of today using the Technology of Today.

**EDITOR SOFTWARE** – An application for your PC (included) Compatible with any PC utilizing Windows 95/98/NT/2000/XP. All page creation and scripting in a simple concise straight forward editor package as to allow the most pages and content to be created with the least amount of man-hours.
